MID TERM EXAMINATIO - OCTOBER 2021

| Programme | $:$ B.Tech. (All Branches) | Semester | FALL 2021-22 |
| :--- | :--- | :--- | :--- |
| Course | $:$ Calculus and Laplace Transform | Code | MAT1001 |
| Faculty | $:$ Dr. Manisha Jain | Slot/Class Number | $:$ |
|  |  |  | A21+A22+A23 |
| Time | $: \mathbf{1 1 / 2}$ hours | Max. Marks | $\mathbf{5 0}$ |

## Answer all the Questions

| Q.No. | Question Description | Marks |
| :---: | :---: | :---: |
| 1. | If $x^{2}=a m+b n, y^{2}=a m-b n$ and V is a function of x and y find the value of <br> i. $\quad x \frac{\partial V}{\partial x}+y \frac{\partial V}{\partial y}$ <br> ii $\quad m \frac{\partial V}{\partial m}+n \frac{\partial V}{\partial n}$ <br> Is there any relation between both the results? | 10 |
| 2 | Consider a sphere of unit sphere from the origin in $x-y-z$ space. <br> Find the minimum and maximum distance of the point $(3,4,12)$ from the sphere by using Lagrange's Multiplier. | 10 |
| 3 | By using the concept of change the order of integration evaluate the following (refer the figure) by assuming $f(x, y)=1$ <br> (i) Evaluate area for the function $\mathrm{y}=\mathrm{f}(\mathrm{x})$ <br> (ii) Evaluate area for the function $\mathrm{x}=\mathrm{f}(\mathrm{y})$ <br> (iii) Write all necessary mathematical expressions | 10 |
| 4 | Find the mass M of the tetrahedron bounded by the coordinate planes and the plane as shown in the figure. | 10 |

|  | given that the density F at any point $\mathrm{P}(\mathrm{x}, \mathrm{y}, \mathrm{z})$ is $m x y z$ |  |
| :---: | :---: | :---: |
| 5 | A particle moves along the curve $x=e^{-t}, y=2 \cos 3 t$, where t is the time. Determine at $t=0$ its <br> (i) Velocity and acceleration vectors <br> (ii) Magnitude of Velocity and acceleration vectors <br> (iii) Components of Velocity and acceleration vectors In the direction of the vector $2 i-4 j+6 k$ | 10 |
